

RONALD GIBA GORGONIA

QA ENGINEER | SOFTWARE MANUAL & AUTOMATION TESTING

CONTACT

Atis St., Doña Josefa Subd., Almanza Uno, 1750, Las Piñas City | ronald.gorgonia.work@gmail.com | +639561690456

SUMMARY

QA Tester with hands-on experience in manual and automation testing, specializing in test case design and execution, API testing, defect tracking, system validation, and end-to-end testing using Playwright. Strong in requirement analysis, software quality assurance, and test automation development. Passionate about continuous learning, improving testing processes, and advancing as a QA Automation Engineer.

EXPERIENCE

SoluxionLab — Quality Assurance Specialist | May 2026 - Present

Research & Development Department

- Designed, executed, and maintained comprehensive manual and automated test cases for ERP, HRIS, CRM, and Project Management modules, ensuring compliance with business requirements and acceptance criteria.
- Performed functional, regression, integration, API, and cross-browser testing using Playwright and Postman, identifying critical defects before production releases.
- Collaborated closely with Product Owners, Business Analysts, and Developers to analyze requirements, review user stories, validate business workflows, and improve overall software quality.
- Created and maintained test plans, test scenarios, test cases, bug reports, and QA documentation while managing defects through Github Issues and supporting Agile Scrum development.

White Cloak Technologies — QA Engineer (Contractual) | Aug 2025 - Feb 2026

Deployed at The Insular Life Assurance Company Ltd.

- Designed and executed functional, regression, and API test cases for enterprise insurance applications to validate business rules and system integrations.
- Performed REST API validation using Postman, verifying request/response payloads, status codes, authentication, and business logic across multiple endpoints.
- Managed defect lifecycle using Azure DevOps by documenting reproducible issues, validating fixes, performing regression testing, and collaborating closely with developers.
- Participated in Agile Scrum ceremonies, reviewed user stories and acceptance criteria, and ensured delivered features met functional and quality requirements before release.
